

About me

I'm a Full Stack Engineer who writes code that works (most of the time) and fixes bugs before the PM notices. I speak fluent Vietnamese, TypeScript, and sarcasm. Still on a mission to save the world, one clean commit at a time.

- **Location:** Binh Chanh, HCM
- **Age:** 31
- **Nationality:** Vietnam
- **Interests:** Code, Guitar, Beer
- **Study:** Can Tho University of Technology
- **Employment:** INNORIA SOLUTION

EDUCATION

Hoa Thanh high school

Ca Mau, Vietnam • August 2010

Surviving high school and laying the foundation for a life fueled by caffeine and logic.

Can Tho University of Technology

Can Tho, Vietnam • September 2013

Mastered the ancient art of balancing deadlines, code compilations, and instant noodles.

WORK

Full stack developer

Binh Chanh, HCM • October 2017 - Present

Starting as a front-end enthusiast, I quickly evolved into the ultimate "One-Man Army". I handle back-end architecture, DevOps sorcery, server management, and seamlessly transition into roles like fixing broken cars, repairing office roofs, plunging toilets, and basically anything else under the sun. If it exists, I'm probably maintaining it.

SKILLS

Here is a summary of my skills

Languages

- Vietnamese (Native & Sarcasm)
- English (Googling errors)
- TypeScript

Frontend development

- React (useState Master)
- TailwindCSS (Div Centering)
- Vue / Angular

Backend & DevOps

- Node.js / Express
- Server Management (Rebooting)
- Docker & K3s (Sorcery)

Survival Skills

- StackOverflow / AI Prompting
- Drinking Coffee
- Fixing bugs I just created
